PROFESSIONAL SUMMARY

Aspiring Data Analyst with skills in Python, SQL, Excel, Power BI, and Machine Learning. Skilled in data cleaning, exploratory data analysis, data visualization, feature engineering, dashboard development, and applying machine learning algorithms to analyze data and identify useful insights.

TECHNICAL SKILLS

Programming: Python, SQL
Data Analysis: NumPy, Pandas, Data Cleaning, Data Preprocessing, Data Wrangling, EDA, Statistical Analysis
Data Visualization: Matplotlib, Seaborn
Machine Learning: Feature Engineering, Regression, Classification, Decision Trees, Clustering, Model Evaluation
Business Intelligence: Power BI, DAX, Power Query, Dashboard Development, KPI Reporting
Databases: MySQL, Joins, Subqueries, CTEs, Window Functions, Views, Stored Procedures
Excel: Excel, Pivot Tables, Data Analysis
Tools: Git, GitHub, Jupyter Notebook, Streamlit, Visual Studio Code

EDUCATION

Sri Venkateswara College of Engineering — Tirupati, Andhra Pradesh
Master of Computer Applications; CGPA: 9.02 — *2024 – 2026*

Sri Venkateswara University — Tirupati, Andhra Pradesh
Bachelor of Science; CGPA: 8.60 — *2021 – 2024*

EXPERIENCE

Deloitte Australia Data Analytics Virtual Experience — Forage

- Completed practical data analytics tasks involving data cleaning, exploratory data analysis, visualization, and business problem-solving.
- Analyzed business datasets using Excel and presented data-driven insights through dashboards.
- Communicated analytical findings to support business decision-making.

PROJECTS

- **Placement Readiness Analysis System** — Built a Decision Tree classification model using academic, aptitude, technical, and communication data, achieving 89% test accuracy. Performed data preprocessing, EDA, feature engineering, and model evaluation.
  Technologies: Python, Pandas, NumPy, SQL, Scikit-learn, Matplotlib, Seaborn
- **Sales Analysis and Forecasting** — Cleaned and analyzed 50,000+ sales records, handled missing and duplicate values, identified business trends, and developed forecasting models with visualizations.
  Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit
- **UPI Transaction Analytics Dashboard** — Created an interactive Power BI dashboard analyzing 100,000+ UPI transactions using KPI cards, DAX measures, filters, and drill-through reports.
  Technologies: Power BI, DAX, Power Query, Excel
- **Customer Sales Analysis Dashboard** — Created an interactive Power BI dashboard to analyze sales, revenue, customer segments, product performance, and monthly sales trends using KPIs, filters, and charts.
  Technologies: Power BI, DAX, Power Query, Excel
